

Headquarters: A&D HOLON Holdings Company, Limited
3-23-14 Higashi-Ikebukuro, Toshima-ku, Tokyo 170-0013, Japan

Representative: Yasunobu Morishima, President and Representative Director

Established: May 1977

Capital: 6,388 million yen (as of March 31, 2025)

Net Sales: 67,083 million yen (consolidated, as of March, 2025)

No. of Employees: 2,438 (consolidated, as of March, 2025)

Business: Business management and asset management of group companies engaged in R&D, manufacturing and sales of measuring and weighing equipment, medical and healthcare equipment, and semiconductor-related equipment; management of subsidiaries; real estate management business

Discover Precision

Since 1977, our group of companies has been at the forefront of developing key measuring and weighing technologies that advance industry and society across the globe. We enhance our customers' ability to create value by relentlessly pursuing more accurate and precise measurement techniques, and by pioneering new technologies that transcend the current boundaries of innovation.

Our Business

Measuring and Weighing Equipment Business

Based on the technology of analog-to-digital signal conversion, our measurement and weighing equipment business offers diverse products and solutions that support various sectors, such as automotive and energy.

Tensile and Compression
Testing Machine

Electronic Micro Balance

Net Sales
30,700 Million yen

Medical and Healthcare Equipment Business

Our medical and healthcare equipment division is at the forefront of providing state-of-the-art medical monitoring devices on a global scale. As this sector undergoes significant digital transformation, we are committed to delivering an extensive array of solutions aimed at upgrading healthcare systems and accelerating the expansion of telemedicine services.

Upper Arm BPM

Portable Automatic BPM

Net Sales
24,100 Million yen

Semiconductor-related Business

We meet the needs of the semiconductor industry by providing semiconductor design circuit measurement on photomasks and defect review/analysis equipment, and units that are indispensable for semiconductor manufacturing.

Photomask Dimension
Measurement System

Nanoelectronics Manufacture
and Control

Net Sales
12,300 Million yen

Measuring and Weighing Equipment Business

A&D Company, Limited operates in the measuring and weighing instruments business.

Measuring Equipment

Globally, research and testing facilities benefit from our high-precision instruments, designed to measure and analyze physical quantities such as sound, vibration, displacement, and intensity. Our unique technologies integrate measurement, control, and simulation solutions that reduce development times and cost. In addition, we are actively engaging in industries that advance carbon neutrality, aligning with our commitment to sustainable and responsible innovation.

Weighing Equipment

We develop devices for measuring mass across a diverse range of requirements through our extensive array of products, including electronic balances, platform scales, and load cells and other sensor components. Furthermore, our equipment is not only utilized in research and testing facilities but is also integrated into automated production lines. Such applications significantly contribute to creating energy-saving technologies across a broad spectrum of industries worldwide.

Medical and Healthcare Equipment Business

A&D Company, Limited operates in the medical and health equipment business.

Medical Equipment

Our portfolio includes accurate and reliable medical equipment such as blood pressure monitors and scales suited for patients in wheelchairs or in hospital beds, enhancing comfort and care. We will continue to provide advanced products and services that support healthcare and improve the quality of patients' lives while keeping abreast of changes in the medical environment and technology.

Healthcare Equipment

Our offerings include a range of home healthcare devices and solutions, such as blood pressure monitors that seamlessly integrate with cloud-based applications for the continuous recording and management of vital health data, including blood pressure, weight, and body temperature. Additionally, we provide connected equipment that supports the advancement of telemedicine, playing a pivotal role in prolonging healthy life expectancy and fostering the development of a healthy, long-lived society.

Global share
10%*

We offer healthcare products and services that contribute to health management globally through our sales network.

* Blood pressure monitors for household use as identified through our internal research.

Semiconductor-related Business

HOLON Co., Ltd. and A&D Company, Limited operate within the semiconductor industry.

CD-SEM and DR-SEM

HOLON Co., Ltd. specializes in CD-SEM, a critical tool for measuring the dimensions of semiconductor photomasks to ensure that they are fabricated accurately and according to the original design specifications. Additionally, HOLON specializes in DR-SEM, which can automatically perform EDX analysis while providing clear images for observing foreign substances and defects on photomasks.

Electron gun, high-voltage power supply and beam deflection circuit

A&D Company, Limited manufactures key components such as electron guns, high-voltage power supplies, and beam deflection circuits, which are used in mask drawing and inspection equipment primarily in the front-end processes of semiconductor manufacturing. These components boast world-class performance, establishing A&D as a leading unit supplier.

Sustainability

Our Group aims to realize a prosperous and sustainable society and increase its corporate value over the medium-to-long term by contributing to solving social issues through our business activities in the fields of measuring and weighing, medical and health care, and semiconductors. We will do this by actively promoting environmental conservation and efforts to reduce our environmental impact through cutting-edge and diverse "measurement" technologies.

Environmental Conservation Efforts Through Business Activities

Upper arm hose-less blood pressure monitor

In November 2024, our Group introduced the "A&D HOLON ECO PRODUCT Certification System" to recognize our products which have excellent eco-friendliness. We are working to reduce environmental impact and preserve the global environment by advancing the development and sales of environmentally friendly products. 10 products were certified in FY2024.

High-precision weighing sensors for integration into production lines

Initiatives to Maximize the Value of Human Resource

Diversity & Inclusion

We are working to create a comfortable work environment and implementing safety and health initiatives so that diverse human resources are able to perform at their best.
